I use Cap Tocochvil for BPH,  
(Bad obst. History), Recurrent abor, PIH,  
Antiphospholipid Syndrome since last 2 yrs. I get  
very good result

Pt getting Cap Tocochvil, Antinately  
in 1st trimester and also pre-conceptionally  
for three to six months get much benefit.  
Pregnancy reaches to term & if not premature  
child (Increase of Bicus 2:3 Lcs) child gets  
more wt & there is no need of NICU.

Cap Sugat is also having benefit  
to mother & child. Child wt gain good even in  
premature child. Child immunology system &  
neuromotor development is good.

As far as my clinical experience  
concern is very satisfactory to me and  
patient & for next generation.

Here we don't have biochemical  
lab to justify but clinical response is very  
good
