Dear Dr. Palep,

At the outset I wish to thank you for your wonderful medication - Pentaphyte P-5.

I have been suffering for the last 12 years from chronic and repeated attacks of urinary tract infections. I was operated for a birch colpo suspension to try and improve the condition, but of no avail. I have been dignosed with a neurogenic bladder, and have a residual urine of 150 -170 ml. I have had a dilation, 3 cystoscopies, urodynamic tests and the whole range of tests.

Conventional drugs bring only temporary relief and wreak havoc with my insides. The last year and a half have been especially bad. I was continously on nitrofurantoin which helped intially and then even that ceased to act. I have tried the whole gamut of drugs but no avail.

At this point I must mention that though I am from Mumbai, I come only for my vacation to Mumbai but am resident in the UK. I am being treated here as well, but with the same effect, only with drugs and no long-term cure.

This time when I came to Mumbai, my urologist Dr. Ramchandra Rao prescribed Pentaphyte P-5. I have been taking it from December 15th and for the first time I am infection free, my pus cells have come down dramatically and I am symtom free.

I have been taking them continuously since that day till today. My question is can I take them on a continuous and regular basis? I have not missed a singe dose since December 15th 2009 and am almost normal. I came with 3 monthjs supply, but can send for more.

Please let me know as I am frightened to stop as I know my infection will come back.. I have my 3 monthly check up with the consultant here in UK on February 25th and intend showing him the literature about Pentaphyte P-5 I got from your medical repr. Mr. Ravi.

I thank you for your time, I will be anxiously waiting for your reply.

With best wishes and kind regards, Mrs. Ingrid de Sales.

Dr.H.S Palep
