SUNDAY CLOSED

Rx MY EXPERIENCE Date 20/4/10

Four to five years back
The patient had foul smelling pus
discharge from umbilicus since
8-10 days when she was referred
to surgeon. He advised surgery. But
patient was not willing for surgery.
Initially for 7 days I gave her
oflox + osnidazole but still she
wasn't getting relief. Then I decide why
not take a chance. & I start her
cap pentaphyte Ps x tds for 7 days
with local application of pentaphyte Ps
cream twice a day. Surprisingly
oozing & foul smell stopped within
one week. Still I keep that patient
on Cap pentaphyte Ps x twice a day
for 1 month. I thought being

P.T.O.

- * वरील औषधी डॉक्टरांना दाखवून घ्यावी.
- * औषधाचे दुष्परीणाम आढळल्यास ताबडतोब डॉक्टरांना भेटावे.
- * औषधी घरपोच सेवा उपलब्ध.

ताज मेडिकल अँड जनरल स्टोअर्स

यंभरवार मार्केट, संभाजी नगर, वाघापूर, यवतमाळ

a herbal product it doesn't
have much side effects and
patient became completely
alright. There was no
recurrence even after stopping
the medicine.
I really I got surprising
result of Cap-Pentaphyte Ps
