Dear Dr Palep Sir,

28/7/10.

I have tried Pentaphyte P-5 cream on cases of fungal infections and pimples. The samples had less fragrance of rose and the results were fabulous. But on using the 20gms tube it was observed that the acne had aggravated. Might be that this tube contained greater concentration of rose perfume. Instead of rose perfume use rose oil. That will also give more better results. Thanking you. regards.

Tamke
